Tracing the ancient route of Odysseus...

This international scientific workshop, 5th in the series of ODYSSEUS meetings, follows the footsteps of its predecessors (Crete 2000, Sicily 2003, Altea 2006, Çeşme 2009) in bringing together researchers and practitioners of freight transportation and logistics to discuss recent experiences, exchange ideas, disseminate research results, and present advanced applications and technologies. It provides a high quality forum for recent developments, trends and advances in the theory, practice and application of mathematical models, methodologies and decision support systems in the field of freight transportation and logistics.

...in an idyllic, unforgettable setting.

Mykonos is located at the heart of the Aegean Sea and is one of the most cosmopolitan islands in the Mediterranean. It is renowned for its clear blue sea, golden beaches and vivid sunsets. Mykonos' traditional, whitewashed architecture, its signature windmills and countless churches create a unique picturesque environment. The town of Mykonos offers exceptional shopping and entertainment opportunities, features a vibrant nightlife, and is only 2 km away from ancient Delos, an island museum designated by UNESCO as a World Heritage Site. The workshop will be held at the Royal Myconian Resort (37° 25' 19", 25° 23' 35"), located on Elia Beach.
